Based on the military tested and adopted Mk13-SD, the 300-TM is a thread mounting suppressor for 7.62mm NATO and .300 Winchester Magnum rifles. Combining the simplicity of direct-thread mounting with an ultra-light-weight, high strength, Titanium body provides precision rifle users with an unparalleled value. The monolithic baffle core of the 300-TM is tuned to deliver class-leading accuracy and minimal point of impact shift.
