Diameter:

1.5"

Finish:

Cerakote™

Sound Reduction:

25dB 7.62 NATO, 39dB 300BLK

Mount:

51T Ratchet Mount

The AAC 7.62-SDN-6 is a compact fast-attach sound and flash suppressor for 7.62x51mm and 300 AAC BLACKOUT (7.62x35mm) weapons. It is 1.25" shorter than the 762-SD and features a fully welded all-Inconel® baffle stack and front end

cap to maximize durability on select fire 7.62mm SBRs. The 762-SDN-6 also functions as a superb multi-caliber suppressor for multiple hosts, providing excellent performance on 7.62 NATO, 300 AAC, 6.8 SPC, 6.5, and 5.56mm NATO. When employed on a 300 AAC BLACKOUT, the overall SPL of 126 dB with subsonic ammo is quieter than the 9mm HK MP5-SD.
