Product Summary

Cyclone

Product Description

Caliber:

7.62 NATO, 300 BLK

Weight:

22.4 oz

Length:

9.5"

Length added:

8.75"

Diameter:

1.50"

Finish:

Cerakote™

Sound Reduction:

30-33dB

Mount:

5/8-24, M18x1

Materials:

Inconel 718 & 316L SS

The rigidly simple threaded mounting design provides reliable precision accuracy with minimal and repeatable zero-shift. Extraordinary sound and recoil reduction are two of the instant benefits of the CYCLONE silencer. Durability is maximized by fully CNC automated fusion welding of every high-temperature aerospace alloy component used in its construction- making 100% suppressed fire possible. The back-pressure lowering design of the silencer aids in shooter comfort, reduces weapon fouling, and minimizes cyclic rate increase. EDM technology is utilized as a final step to ensure precise bore alignment and enhance accuracy. The elimination of approximately 95% of the muzzle report nullifies the need for ear protection, facilitates field communications, and masks the location of the user.

*NOT FOR USE ON SCAR 17
