Product Description

For those demanding absolute performance the Sandman-L™ delivers. Made and constructed from the same materials as the “S” version, the “L” is only 8.9 inches in length, but offers a true sound reduction of 31dB firing standard 7.62 ammunition.*

This is the best performing and quietest 7.62 suppressor on the market. The Sandman-L™ uses our industry best QD system for fool-proof quick one handed mounting. No seizing, and minimal point of impact shifts.

The mount features Nitride® finished 17-4 stainless steel construction for the ultimate in durability.

The Stellite® baffles form a solid welded core for extreme durability with a detachable front cap featuring an integrated flash hider. The entire suppressor gets a Cerakote® finish for ultimate corrosion protection. For a tactical bolt rifle or a .308 AR there isn't a better can in the Sandman-L™ class.
