Product Summary

DRT 9mm 20 round box

Product Description

DRT lead-free projectile is a revolutionary round. The bullet breaks apart on contact with a solid surface. The handgun ammunition is made to be an all-purpose round, disintegrating into a cloud of dust on steel but yet is effective on an organic target. It is a target and a carry round. Our round can be fired by law enforcement officers without any fear of ricochet or pass through, or fear of injury or death to innocent bystanders from ricochet or pass through.
