### Product Summary

G5

### Product Description

If you want "high speed, low drag" this is it. Every component of this suppressor has been critically assessed, shot hard, improved upon, thought through, and tested tough to become the new standard in 5.56mm quick mounting suppressors. Lighter, stronger, quieter, more durable and maintenance-free, the G5 is made for those that demand the apex of performance.

Titanium, stainless steels, and inconel are mated throughout the G5 to ensure the

right material for each task..

It adds 5.5 inches to the overall weapon system length, affixing over our QUICKMOUNT flash hider – an easy push and twist that may be done wearing gloves, in any weather condition, and in total darkness. The mount provides repeatable POI shift each time it is mounted.

The barrel portion of the mount is torqued into position to assure utmost accuracy. By utilizing additional flash hider mounts on a variety of weapons, the G5 suppressor can be quickly, easily, and securely moved from weapon to weapon as the situation requires. The G5 QUICKMOUNT retains compatibility with the older Bi-Lock mounts.

QUICKMOUNT Flash hidere are available in 1/2-28 (for most US mfg. carbines), a special 1/2-28 utilizing the Smith Vortex flash hider with our lockup, Metric 15x1RH (HK), 9/16-24 (RH or LH), or with a flash hider that mates G5 suppressors with the FN P90 PDW.
