Product Summary

HVT-QM

Product Description

An efficient suppressor for rifles chambered in 7.62x51mm NATO and .30 caliber cartridges of similar case capacity, the Gemtech HVT sets the bar for endurance and reliability. The HVT has an unusually quiet sound signature that is indistinguishable from, and masked by, the bullet flight noise, making it ideal for both urban and rural tactical operations. The Gemtech Quickmount attachment system permits consistent mounting with repeatable accuracy. The male mount is torqued into position over a threaded barrel to assure utmost accuracy, and the suppressor affixes over with a simple, one-handed movement with no gates, latches, or threads to stick or fumble. It's either on, or it's off. There are no "Is it on where it should be?" questions with the Quickmount.

QUICKMOUNT adapters sold separately.

- Caliber: 7.62mm NATO / .308 - Sound Reduction: 30 dB - Length: 9.2" - Diameter: 1.5" - Weight: 28 oz. -
