Product Summary

Isis-2

Product Description

The Isis-1 was great, the Isis-2 (new for 2012) is even better! Now rated for SUBSONIC .300 Blackout as well as centerfire pistol and rimfire calibers, the Isis-2 is truly among the quietest and most versatile 9mm pistol suppressors on the market.

Improvements to the old design include a threadless tube (both stronger and easier to disassemble), and improved suppression (that's right, it's even quieter!) Until now, sacrifices had to be made when picking out a 9mm suppressor. While

the industry standard suppressors that accept multiple mounts are excellent performers, they cannot be effectively cleaned or used with dirty rimfire ammunition due to the fact that they are sealed units. Our Isis-2 accepts industry standard recoil booster, tri-lug, uzi, and fixed thread mounts and disassembles easily for cleaning and user-service with our included billet disassembly tool.

Specifications: Caliber.....9mm (suitable for multi-caliber use)
Length.....7.875” Diameter.....1.375”
Weight.....7oz Tube Material.....6061T6 Baffle Material.....6061 T6 Design.....Mono-Baffle, Threadless
Tube Design, Take-apart Tool Included Finish.....Anodized Matte Black Needs Booster Mount \$150
